

ARE YOU UP FOR THE CHALLENGE?

Did you know that we are using the same water as the dinosaurs?

Water can be found in the ground, in rivers and lakes, or frozen in ice and snow.

Powered by the sun, Earth's water is recycled over and over again!

Travel anti-clockwise around the board.

First player to FINISH wins.

Place the game on a table, desk or even on the floor!

Invite your friends or family to sit around the water cycle game.

HOW TO PLAY

Each player will need a game piece. This could be a token or a pebble.

You will also need a coin to flip.

If you flip **heads** move forward 1 space,

If you flip **tails** move forward 2 spaces,

and follow the symbols:

Skip a turn

Move ahead 3 spaces

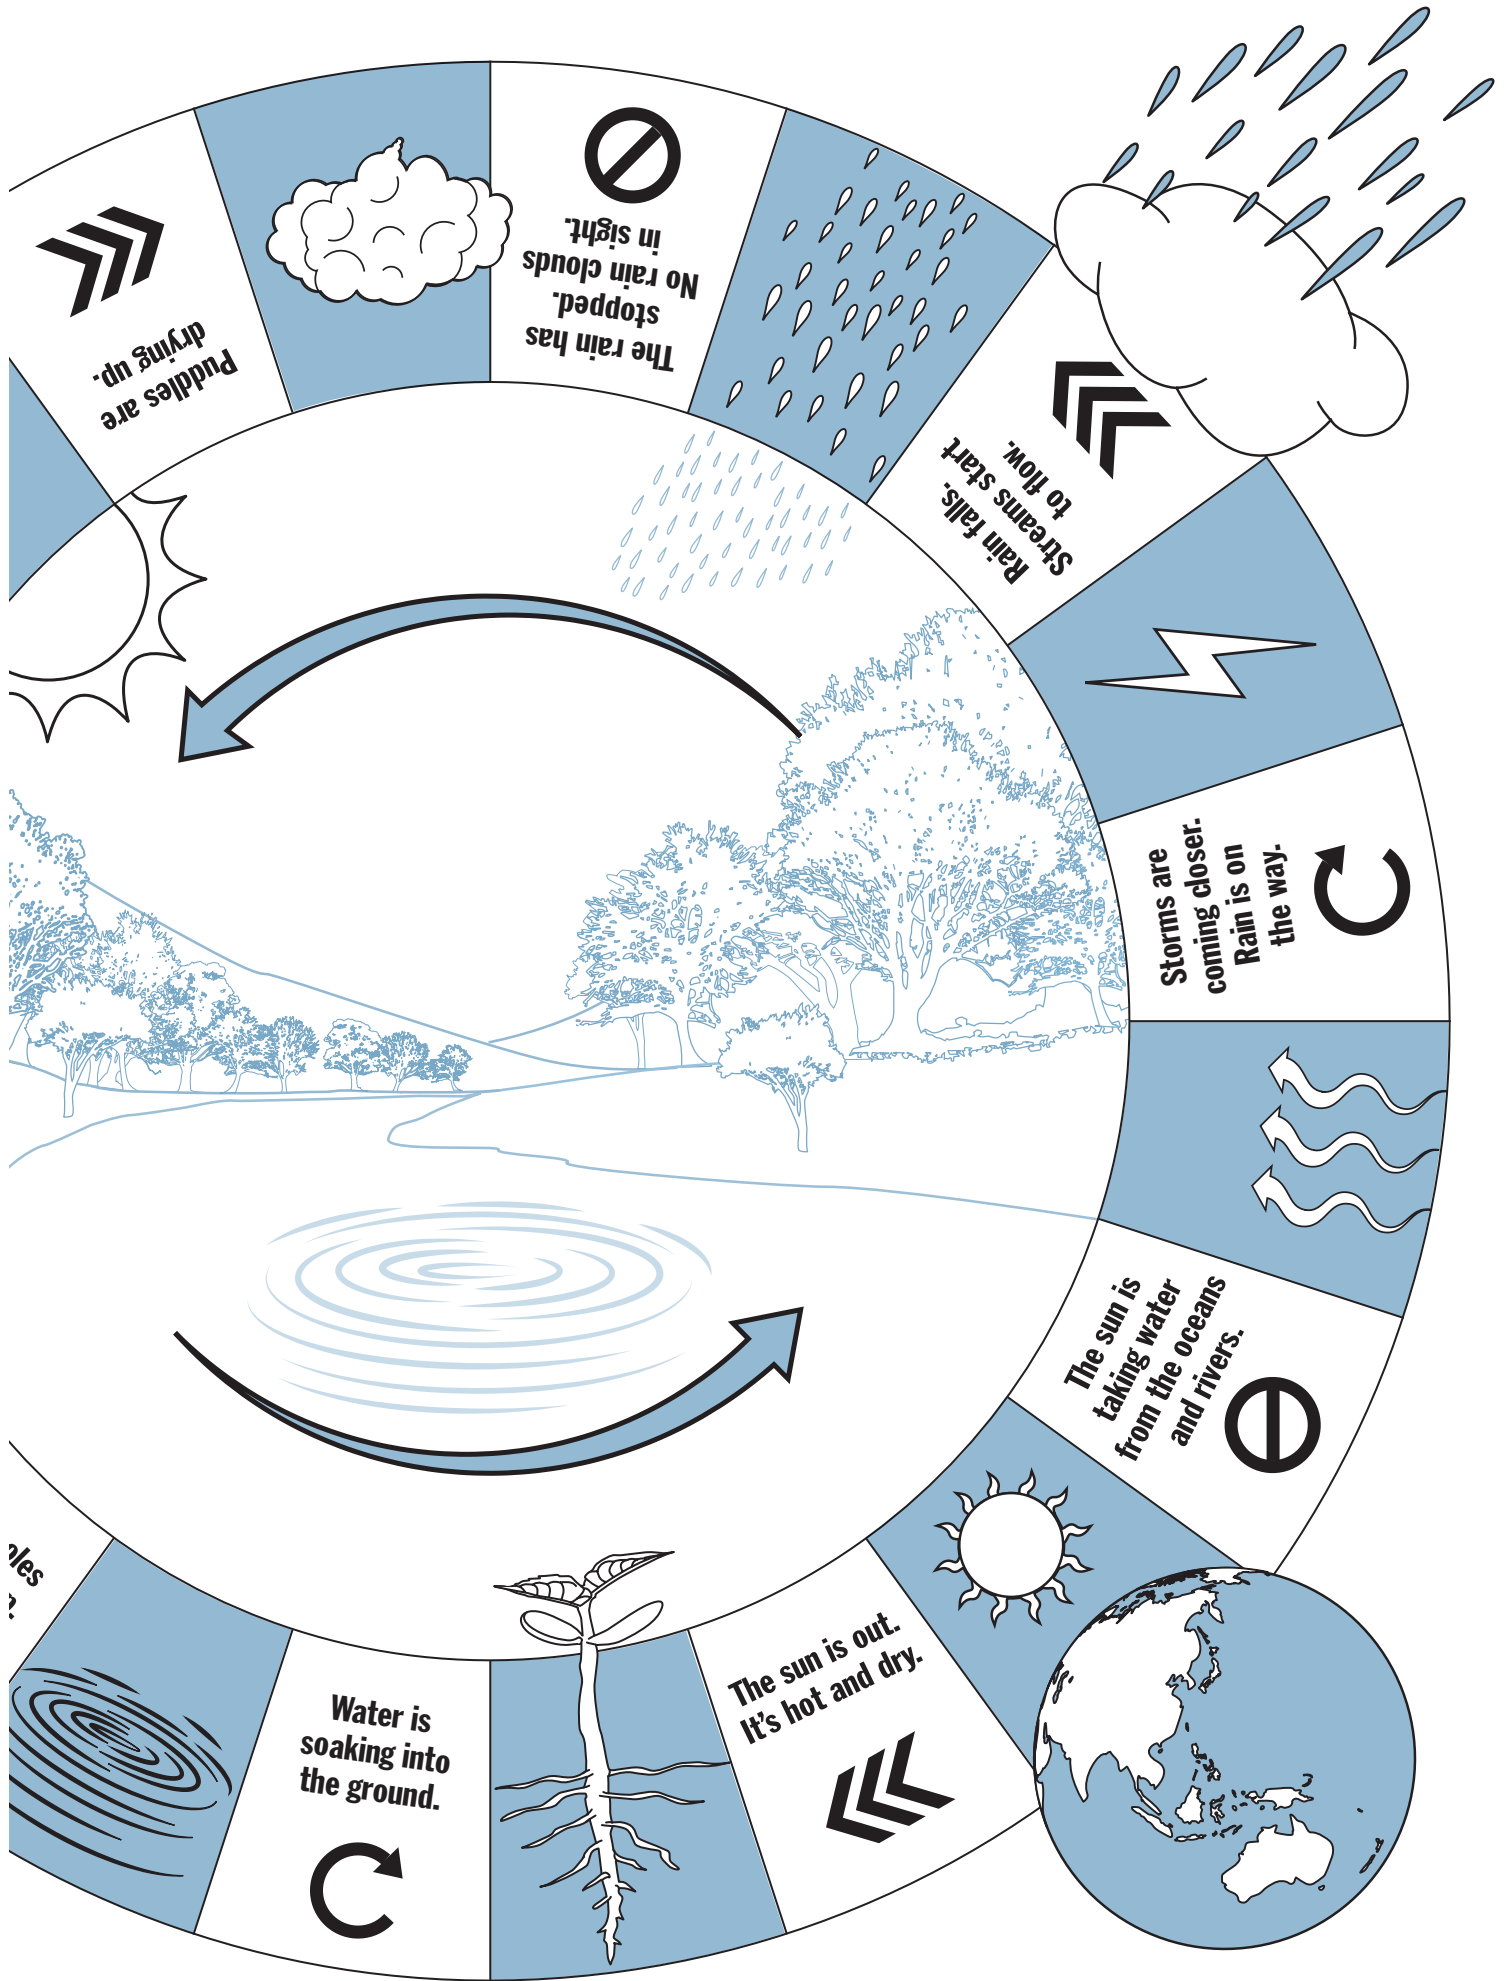

Move back 3 spaces

Have an extra turn

Storms are coming closer. Rain is on the way.

Rain falls. Streams start to flow.

The rain has stopped. No rain clouds in sight.

Puddles are drying up.

The sun is out. It's hot and dry.

Water is soaking into the ground.

The sun is taking water from the oceans and rivers.
