

Explore the world of water bugs

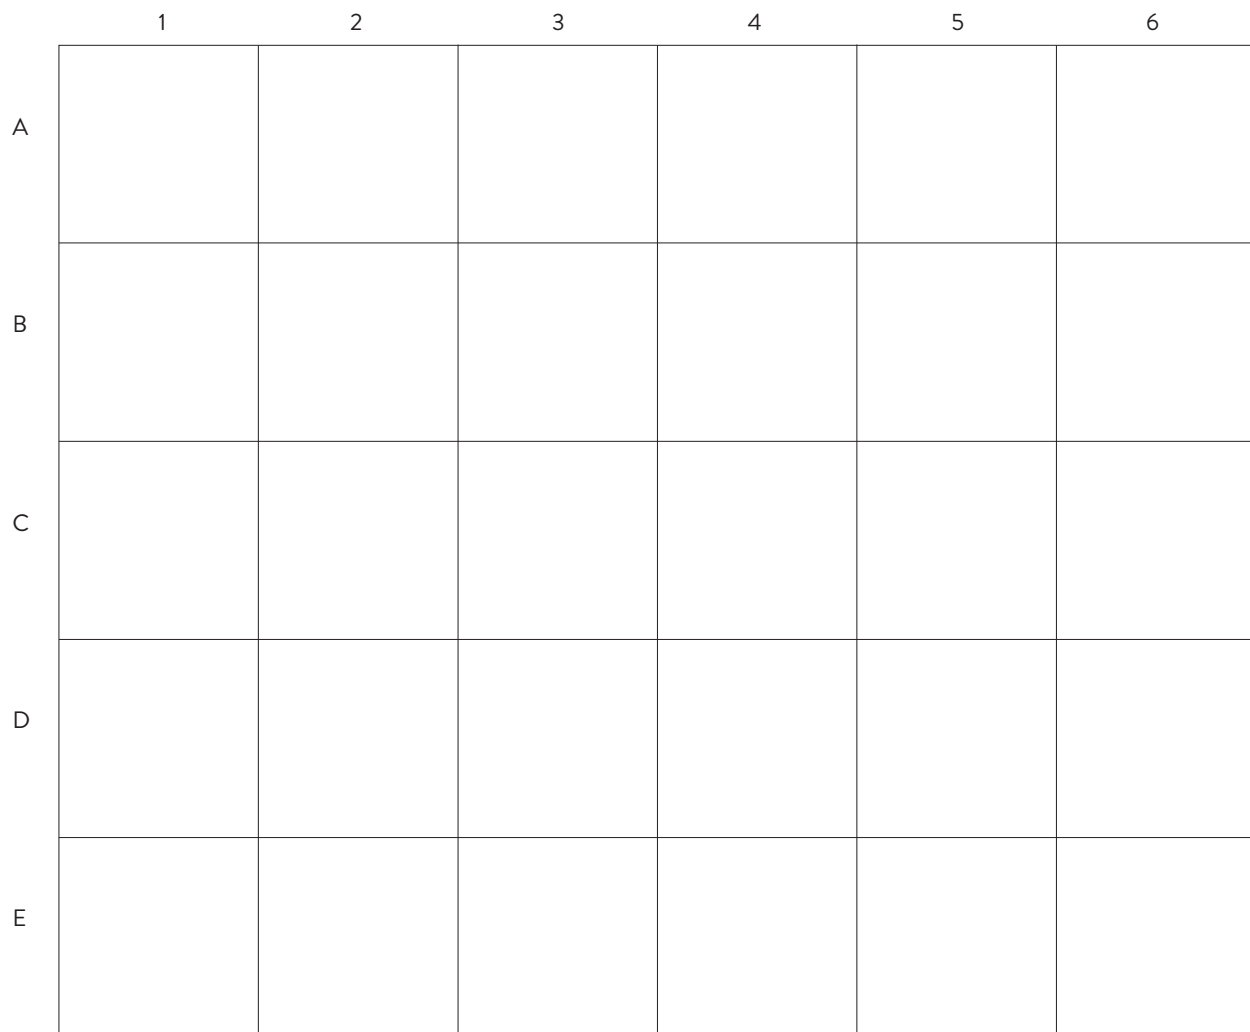

Waterways are home to many creatures, including water bugs. The types of water bugs and the number of them living in the water can help us understand how healthy the water is.

Diving Beetle

Use the grid lines to enlarge your water bug. You might find it easier to copy it one square at a time.

-  Diving Beetles live in still water or quiet areas of flowing freshwater.
-  They eat snails, tadpoles, small fish and other water bugs.
-  Diving Beetles keep air in a special space under its wings.

How sensitive is your bug to pollution in the water?
