

Application to amend a flood work approval

Use this application form to apply to amend an approval to construct and use a specified flood work at a specified location under Section 92 of the *Water Management Act 2000 (WMA)*. To amend an approval for a flood work means changing the details of an existing flood work approval.

Your application may be assessed in the same way as an application for a new approval for a flood work.

In certain circumstances a flood work may be exempt from the requirement to hold a flood work approval. Refer to the [guide](#) for further information.

Before commencing any work, it is recommended you contact our team to determine if your proposed flood work is an exempt or prohibited work. Bookings can be made on our [website](#).

If you intend to **take water** you must use a different form to apply for a water supply work approval.

If the work exists but there is no flood work approval you will need to use the [Application for a new flood work approval form](#).

For further information on floodplain harvesting, please visit our [website](#). WaterNSW may contact you to request further information in relation to this application.
